# Weekly Coal Production

Energy Information Administration  
Washington, D C

***Contains Supplementary Data***

Production for Week Ended:  
October 12, 1985

## Preface

## Contents

### The WCP

The *Weekly Coal Production* (WCP) provides weekly production estimates of U.S. coal by rank, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report* and the *Quarterly Coal Report*.

General information about this publication may be obtained from Robert Harris, Chief, Data Systems Branch, Kenneth Shanks, or Judith Wood. For specific information on the contents of this publication contact the National Energy Information Center (NEIC) at (202/252-8800).

# Highlights

U.S. coal production in the week ended October 12, 1985, as estimated by the Energy Information Administration, totaled 18.18 million tons (bituminous coal and lignite, 18.10 million tons; Pennsylvania anthracite .08 million tons). This was 2.5 percent higher than the previous week, and was 19.8 percent higher than production in the corresponding week of 1984.

Cumulative U.S. coal production from January 1 through October 12, 1985 was estimated at 697.99 mil-

lion tons, 4.4 percent below the 729.87 million tons produced in the comparable period in 1984.

In late September, Louisiana became the Nation's 27th coal-producing State and the 4th State to mine lignite.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).
